Product Name: Human Neutrophil Migrasome Extraction Kit

Catalog No.: MGS-P008

Lot No.:

Inspection Date		**QC Inspector**	
QC Item	**Acceptance Criteria / Method**	**Result**	**Disposition**
Raw-material CoA and shelf-life verification	Verified against the supplier CoA: consistent with the previous lot and remaining shelf life >6 months	Meets specification	Pass
Raw-material appearance	Conforms to the supplier description; where applicable, the solution is clear and free of precipitate, turbidity, or contamination	Meets specification	Pass
Number of reagent components	Verify that the reagent count matches the product manual	5	Pass
Reagent volume	Volume of each component, determined gravimetrically, matches the product manual	Meets specification	Pass
Functional test of kit reagents	Western blot; confocal microscopy	Meets specification	Pass
Shipping outer packaging	Clean; undamaged; undeformed; no leakage	Meets specification	Pass
Kit packaging and components	Reagent containers are clean and undamaged	Meets specification	Pass
	Kit specification	Meets specification	Pass
	Labeling is legible and clearly states the name, manufacturing date, shelf life, precautions, and other required information	Meets specification	Pass
	Visual inspection under natural light: uniform, transparent color; no visible particulate matter; no phase separation	Meets specification	Pass
Conclusion	In accordance with the company's inspection criteria, the samples from this lot passed all tests		
Authorized Signature		**Date**
